Team ID	PNT2022TMID31751
Project Name	Car Resale Value Prediction

Project Flow

· The user interacts with the UI (User Interface) to enter the input features· Entered input features are analysed by the model which is integrated· Once the model analyses the input, the prediction is showcased ontheUI

To accomplish this, we have to complete all the activities and tasks listed below

· Download the dataset.
· Pre-process the data.
· Analyse the pre-processed data.
· Train the machine with pre-processed data using an appropriate machine learning algorithm.
· Save the model and its dependencies.
· Build a Web application using the Flask framework that integrates with the model trained.
